

-  Sewage
-  Domestic use
-  Civil use

※ TRITUS-INOX pumps deliver reliable performance in demanding work conditions

### PERFORMANCE RANGE

- Flow rate up to **250 l/min** (15 m<sup>3</sup>/h)
- Head up to **24 m**

### INSTALLATION AND USE

The **TRITUS-INOX** series is equipped with a robust, **hardened stainless steel blade**, expertly designed to cut through solids and fibers found in domestic wastewater and sewage, for pressurized transfer of materials into sewage systems via small-diameter piping

### INCLUDES

- ※ Power cable length **10 m**
- ※ Float switch (exclusive to single-phase models)

### APPLICATION LIMITS

- Depth below water level up to **5 m** (with an appropriately sized power cable)
- Liquid temperature up to **+40 °C**
- Bottom drainage level up to **85 mm**
- **Minimum immersion for continuous service: 300 mm**

### AVAILABLE UPON REQUEST

- ※ Different voltage or frequency
- ※ Three-phase pumps
- ※ For TIGm 1.1 and TIGm 1.3 external control cabinet for increased operational safety due to special capacitor that significantly increases torque. The panel includes the manual reset motor protection switch.
